AUTHOR	King, Gail Buchwalter, Ed.
TITLE	Fact Book on Theological Education for the Academic Years 1988-89 and 1989-90.
INSTITUTION	Association of Theological Schools in the United States and Canada, Vandalia, OH.
REPORT NO	ISSN-0363-7735
PUB DATE	90
NOTE	124p.
AVAILABLE FROM	The Association of Theological Schools in the United States and Canada, 10 Summit Park Drive, Pittsburgh, PA 15275-1103.
PUB TYPE	Reports - Research/Technical (143) -- Statistical Data (110)
EDRS PRICE	MF01/PC05 Plus Postage.
DESCRIPTORS	College Admission; College Faculty; College Students; Compensation (Remuneration); *Enrollment; Enrollment Trends; *Expenditures; Foreign Countries; Full Time Students; Higher Education; *Income; *Teacher Salaries; *Theological Education; Trend Analysis; Tuition
IDENTIFIERS	Canada

ABSTRACT

This 20th edition of the fact book provides information on enrollment, admissions, revenues and expenditures, and faculty salaries obtained from 202 institutions of theological education in the United States and Canada. The first chapter consists of seven tables which describe member institutions in terms of their most common identifying characteristics, such as data on their enrollment breakdowns, levels of educational programs and the numbers of schools offering them, and their accredited status. Chapter Two provides data on enrollment and includes numbers of applicants and acceptances; admission policies; total head counts; comparable enrollments; and enrollments by denominational affiliation, degree, gender, and race. Chapter Three provides personnel compensation data, such as total compensation trends for both U.S. and Canadian accredited schools; and compensation comparisons by denomination, size, accredited or nonaccredited status, country, and highest degree. Chapter Four presents data on institutional finances, involving tuition costs, revenues, and expenditures. Appendices include a list of denominational codes and a glossary of administrators and faculty. (GLR)

THE ASSOCIATION OF THEOLOGICAL SCHOOLS IN THE UNITED STATES AND CANADA

The Association of Theological Schools in the United States and Canada is the primary accrediting agency for graduate theological education. Tracing its origins to 1918 when formal consultations on theological education were begun, the Association numbered 205 institutions in 1988 and 1989 and 211 institutions in 1990. They reflect the diversity of the religious communities and university relationships in the two national communities. Its purposes include, within a general mandate for the improvement of theological education, the establishment of standards and the accreditation of institutions, serving as a forum for shared interests, and the consideration of issues among members and between members and related agencies. In the experience of its standard setting duties, the Association has maintained a membership list of accredited schools since 1936. The Association also publishes annually a Directory of Theological Schools.

The officers of the Association for the 1990-92 biennium are:

President
JIM L. WAITS
Dean, Candler School of Theology
Atlanta, Georgia

Vice-President
DONNA R. RUNNALLS
Dean, McGill University Faculty of Religious Studies
Montreal, Canada

Secretary
KENNETH B. SMITH
President, Chicago Theological Seminary
Chicago, Illinois

Treasurer
ANTHONY T. RUGER
Special Assignment, Presbyterian Church (U.S.A.)

The Association's professional staff includes:

Executive Director
LEON PACALA

Associate Directors
DANIEL O. ALESHIRE
GAIL BUCHWALTER KING

INTRODUCTION

This is the twentieth annual edition of the ATS Fact Book. This edition covers the data supplied in two years, the fall of 1988 and 1989. Although the Fact Book has been and will again in the future be published annually, this edition was delayed because of a major revision of the ATS Annual Report Forms which constitute the data base, a substantial revision of the format and content of the Fact Book itself, and the introduction of a new computer system at the ATS offices. We beg the understanding of those who regularly look to these tables. We trust at the same time that the new format and content will prove of better service to member schools and others. A growing sense of inadequacy in the previous editions prompted a lengthy process of revision which is detailed for history's sake in the following Chronicle.

The data for the 1988-90 Fact Book were submitted on the revised ATS Annual Report Forms required each year of all member schools. These reports include information on enrollment, admissions, administrative staff, and faculty salaries for the current year. They also include graduation statistics, financial reports, fund raising reports and library data for the previous fiscal year. Per student revenue and expenditure costs are based on the full-time equivalent enrollment as reported by the schools in the previous year and on the audited financial data for that year as reported in the fall of the current year. Some data such as age of enrollment and globalization are reported only every other year. Since these categories are new, they will be included only in subsequent editions of the Fact Book. As in the past, all salary scales reported in the volume have been edited to preserve confidentiality. Any salary data field with only one being reported does not provide any salary information. If two or three are reported, the percentile distribution and median are eliminated to preserve confidentiality of individual salaries. A major change in the format of this volume is that the textual commentary and analysis is published together with each table rather than being offered as a lengthy commentary in the first part of the volume followed by the tables in the second part.

Purpose: From the beginning of publication a primary purpose of the Fact Books has been to provide annually information on parallel patterns permitting ready comparisons across the years. Most changes over the first 19 years have generally been in the form of providing additional information not previously supplied or to acknowledge changes in educational practice that have occurred. During 1987-88 the Annual Report Forms underwent major revision which not only broadened the scope of data being requested of schools but also refined the data in many categories to provide a more accurate basis for determining trends. This information is of significant help to administrators for purposes of long-range planning. At the same time it is used by the Commission on Accrediting and by visiting teams to monitor a school's progress in relation to common expectations in theological education.

Conclusion: This edition of the Fact Book has been prepared by ATS staff with the counsel of the Fact Book Advisory Committee and is offered to the ATS member schools, as well as to the general public with the hope that it will be useful to those with responsibility for the management of the theological education enterprise in North

America. The work has been done with the strong conviction that management decisions are best made when the persons charged with making them have the widest range of and most complete data available to inform their deliberations.

CHRONICLE OF THE REVISION

I. December, 1981--Leon Pacala (ATS), Robert Lynn (The Lilly Endowment), and John Fletcher (NIH) met to discuss the expanding needs of data on theological education: (a) to assist schools in planning; (b) to offer a basis for research on effectiveness of schools in relation to their stated mission; (c) to provide data on costs, use of resources and range of programs in relation to the stated mission; (d) to provide a frame of reference in relation to external data to interpret institutional data, e.g., changes in the profession, motivation of candidates, cooperative structures; (e) to provide data comparable to research and development data.

II. December, 1982--The ATS Executive Committee authorized staff to explore the expansion of present data bases and to seek a limited grant for planning and possible implementation of a feasible program and authorized an advisory panel and the use of consultants.

III. December, 1985--A consultation was held at the Lilly Endowment to review and identify products and services needed by theological schools for analysis and planning.

IV. March, 1986--A six-person Task Force on Management Information Systems and Services (MIS) identified at the consultation met to clarify its mandate and reporting responsibilities, and to set time lines for its work. It established criteria for evaluating data products and services and reviewed those which had been identified. First priority was given to revision of the Fact Book both as to content and to format.

V. September, 1986--The Task Force, chaired by Anthony Ruger, met to review services and products in light of more recent research, and it established further goals for the ATS Institutional Director, for a Personnel Directory, and for an ATS Comprehensive Data Base.

VI. December, 1986--The ATS Executive Committee received a preliminary report from the MIS Task Force and moved to support the continuance of its work. It also requested the preparation of a proposal for funding to the Arthur Vining Davis Foundation which granted the needed support for the project.

VII. January, 1987--A third meeting of the Task Force received reports on communications systems from technical consultants. It also outlined a foundation proposal to help design and implement a new information system for ATS framed on a School Information System with major data areas to include a school profile for the Directory and the Membership List, plus a detailed school information base to be used for the ATS Fact Book and for the accrediting history of each school. The Task Force also worked on the revision and expansion of the ATS Annual Report Forms required

of all member schools and which in their revised form are the base for all reports starting with the fall of 1988.

The Task Force also determined that in the revision of the Report Forms the following norms be followed:

(a) The categories of the Integrated Postsecondary Education Data System (IPEDS) report forms or those of Statistics Canada would be used wherever applicable;

(b) The terminology would be that of the Common Language for Postsecondary Accreditation: Categories and Definitions for Data Collection (1985, NCHEMS and COPA, Washington, D.C.);

(c) The financial categories for revenue and expenditures would be those of the NACUBO guidelines or of CAUBO, its Canadian counterpart, as far as possible.

The obvious concern was to avoid duplication of work for member schools wherever possible and at the same time to broaden the base for purposes of comparison with other fields.

VIII. December, 1987--The ATS Executive Committee received the final report of the MIS Task Force and acted to recommend the appointment of a five person Fact Book Advisory Committee, chaired by Lowell H. Fewster, to assist with the revision of the format and content of the Fact Book. The Advisory Committee was elected at the 1988 Biennial Meeting and was reappointed in 1990.

IX. July, 1988 to September, 1989--The Advisory Committee worked on the design of the revised Fact Book for which it proposed some 99 tables plus several optional tables. Forty-one of these tables have been selected for the first edition of the revised Fact Book. They include the data deemed most helpful to schools for planning purposes. The tables are arranged in four chapters: Profiles of all Member Schools; Enrollment Data; Administrative and Faculty Compensation; and Comprehensive Financial Data on Revenue and Expenditures. Future editions of the Fact Book will expand on these tables with additional chapters and likewise with additional tables for existing chapters as the computer programs are validated and sufficient dependable data become available to permit the analysis of trends. ATS staff are indebted to the members of the Task Force and the Advisory Committee for the time which was given generously and for the superb quality of counsel.

CHAPTER I: INSTITUTIONAL CHARACTERISTICS

Introduction

The first chapter consists of seven tables which describe each member institution in terms of the most common identifying characteristics derived from the Annual Report Forms in the section on Institutional Characteristics (IC-1), on Enrollment (EF-1 and -3), on Finances (F-1), and on Personnel (P-1 and -3). The tables are in continuity with the prior ATS Fact Book for 1987-88, Tables, A, B, and C-1 (pp. 47-84) with the addition however of personnel and financial characteristics in the current revised edition. These tables are the handiest means for a general depiction of a given school for purposes of comparison. The reader should note the following:

(a) Data is for fall 1988 and fall 1989 only;

(b) Head Count (HC) enrollment is comparable to similar tables in previous Fact Books;

(c) Full-Time Equivalent (FTE) enrollment is not comparable to similar tables in previous editions of the Fact Book because the guidelines for computing FTE enrollment were changed starting with the revised Annual Report Forms on which these tables are based.

(d) In the numerical sequence of tables, some numbers will be missing because tables were selected from the full range of suggested tables to present the most significant data. The sequencing allows for the gradual adding of further tables as suggested by the Advisory Committee.

NOTES

Table 1.01: Listing of Individual Institutions

This table provides an alphabetical listing of all member schools accredited and nonaccredited, U.S. and Canadian, with the more significant institutional characteristics. Data are derived from the fall 1989 ATS Annual Report Forms with the exception of enrollment which offers both fall 1988 and fall 1989 data. The accredited status of schools is reported as of fall 1989. The table is based on the Annual Report Forms, Sections IC-1; EF-1; F-1; S-2; P-1 and -3. This table is parallel to the prior ATS Fact Book, Tables A and B, pages 47-83. Table 1.01, however, lists all schools in alphabetical sequence rather than by separating accredited from nonaccredited schools as in prior years.

Classifications:

Accredited status is the first characteristic listed. It includes the three classes of membership in the Association. Accredited, candidate for accredited status, associate member. This is followed by U/I--University/College affiliated or Independent/Free-standing. The classification of "University Affiliated" is restricted to schools of theology which are an integral part of a larger institution which possesses at least two other professional schools or departments at the graduate level. This is a category which has been used for many years to signal the broader level of resources immediately available to those theological schools. The location of Province or State is indicated by the use of standard abbreviations. Denominational codes for the schools are taken from the ATS Annual Report Forms, EF-3, which lists both the denomination and the accompanying code. A copy of this form is appended to this chapter for the convenience of the reader. Current Fund expenditures are taken from the Annual Report Forms, F-1, Part B, Line 14, for the total Educational and General Expenditures, and F-1, Part B, Line 18, for total expenditures, but subtracting all non-mandatory ("voluntary") transfers. Total expenditures do include costs of auxiliary enterprises such as housing, food service, bookstore and the like which are not directly supportive of the educational function of the school. Full-time and part-time faculty are listed as reported by the school on form S-2 (Faculty Salary) and P-3 (Part-time Faculty). The distinction between full-time and part-time faculty is based not on the number of hours or courses taught but rather on whether the salary is contracted on a full-time basis or on part-time availability to the teaching function of the school. The full-time equivalent faculty is the sum of all reported full-time faculty plus the sum of the reported percentages of teaching for all part-time faculty divided by one hundred.

Denominational schools	174	84.9 %
Interdenominational/Nondenominational	31	15.1 %
Canadian schools	29	14.1 %

Table 1.02: Summary of Selected Institutional Characteristics

The table offers data both in number and percentage for several types of schools. It is based on all schools, accredited and nonaccredited. University related schools are those related to a larger institution with at least two other graduate level professional schools or departments. Schools are classified as members of a cluster only if the relationship includes at least two other schools of theology. The clusters in the Association of Theological Schools are listed at the very end of the ATS Directory, Bulletin 39, Part 4, pp. 71-73. The six primarily Black schools are Hood Theological Seminary, Howard University School of Theology, Interdenominational Theological Center, Payne Theological Seminary, Shaw Divinity School, and Virginia Union University School of Theology. The primarily Hispanic school is the Evangelical Seminary of Puerto Rico.

Table 1.03

ATS Membership Structure and Changes					
Status	Current Year Added	Current Year Total	Prior year Total	5 years ago	10 years ago
Accredited		179	175	169	156
Nonaccredited: Candidate		8	9	10	NA
Nonaccredited: Associate		18	21	21	40
TOTAL		205	205	200	196

Table 1.03: ATS Membership Structure and Changes

This table reports changes in ATS membership status for the past ten years. The Association has three categories of membership. The category of candidate for accredited membership was initiated in 1980. Hence, it does not appear in the listing for ten years ago--1979. Candidates are those institutions which after review on the basis of Association procedures and standards have been authorized by vote of the Commission on Accrediting to begin the self-study process leading to an accreditation review. Candidacy status is normally granted for two years. Accredited members are those which after review on the basis of Association standards are elected by the Commission on Accrediting to accredited membership. Associate members are those which have met the criteria for associate membership prescribed by the Association and have been recommended by the Commission on Accrediting and elected by a two-thirds vote of the accredited members. They have no status as accredited but are assumed to be working toward it. The three categories of membership are described in the ATS Constitution, Bulletin 39, Part 1, Article IV, page 4, and in the ATS Procedures, Standards and Criteria for Membership, Bulletin 39, Part 3, pages 3-8.

Table 1.04a

Distribution of Schools by Total Head Count Enrollment				
Enrollment Size	Current year	Prior year	5 years ago	10 years ago
1 - 75	27	30	28	38
76 - 150	63	63	64	63
151 - 300	59	56	52	55
301 - 500	32	31	32	20
501 - 1000	16	17	14	12
over 1000	5	5	7	5
Total	202	202	197	193

Table 1.04a: Distribution of Schools by Total Enrollment--Head Count (HC)

This table reports the size of member schools in six groupings based on total enrollment (HC), whether full-time or part-time. The data is based on the section on Enrollment of the ATS Annual Report Forms (EF-1). It includes all schools, accredited and nonaccredited, Canadian and U.S. It is comparable to the distribution of schools in the prior ATS Fact Book for 1987-88, Table C-1, page 84. The reader will notice that the number of schools reporting enrollment is normally at least three less than the total number of member schools, e.g., as found in Table 1.03. This is because three of the member schools are either part of a larger institution which reports the enrollment--Berkeley Divinity School at Yale, and Bexley Hall at Colgate-Rochester--or a coordinating agency such as the Toronto School of Theology in which all enrollment is reported by the constituent member schools.

Table 1.04b

Distribution of Schools by FTE Enrollment				
FTE Size	Current year	Prior year	5 years ago	10 years ago
1 - 75	56	56	49	NA
76 - 150	65	68	73	
151 - 300	52	49	49	
301 - 500	18	19	12	
501 - 1000	8	7	10	
over 1000	3	3	4	
Total	202	202	197	

Table 1.04b: Distribution of Schools by FTE Enrollment

This table reports the same categories of distribution as the previous Table 1.04a but based on full-time equivalent enrollment (FTE) in which part-time enrolled students are converted to full-time according to the sum of the percentages of full-time student load taken by part-time students, divided by one hundred. The FTE distribution is not available for 1979. The column is included in the table because it will be used in future editions. Please note that the total number of schools listed at the base of all columns in Tables 1.04a and 1.04b is the total number of the member schools reporting positive data for that column, not the total member schools for the Association in that particular year.

Table 1.05

Frequency Distribution of Schools by FTE Enrollment												
1-50	51-100	101-150	151-200	201-250	251-300	301-350	351-400	401-450	451-500	501-550	551-600	601-1000	> 1000
29	61	31	26	12	14	7	6	3	2	3		5	3

Table 1.05: Frequency Distribution of Schools by FTE Enrollment

Table 1.06

Levels of Educational Programs of Accredited Schools			
	Number of Schools at each level		
Level	Current year	Prior year	2 yrs ago

M.A. Professional Degree	57	52	
Other	16	18	
Ph.D./Th.D./Ed.D./S.T.D.	44	48	
Postbaccalaureate Certificate	30	27	

Table 1.06: Levels of Educational Programs of Accredited Schools

Table 1.06 lists only accredited schools, Canadian and U.S. It provides a listing of the number of schools which have reported degree programs in several major categories. The list follows the terminology of ATS Institutional Standard XIII on Nomenclature, Bulletin 39, Part 3, pp. 32-34. The only exceptions from this nomenclature are those categories which report bachelor's degrees or associate degrees for which the ATS does not offer approval since they are outside the stated scope of the Association as recognized and approved by COPA and the Division of Agency Evaluation of the USDE. Another exception is the postbaccalaureate certificate which is not a degree program. The information for the table is derived from the section on Institutional Characteristics (IC-1) of the ATS Annual Report Forms for the fall of 1989. The Master of Divinity or the Master of Religious Education is the first professional degree offered by all member schools with the exception of six which either offer degrees through another member school or which offer doctoral level degrees which are based on and presume the Master of Divinity.

NOTES

CHAPTER II: ENROLLMENT

INTRODUCTION

All ATS member schools are required to submit each fall a comprehensive set of Annual Report Forms. The tables in the ATS Fact Book are based on the data from these forms. The most extensive section of the reports is that on Admissions and Enrollment (A-1, EF-1-6, C-1) which embraces reports on total enrollment (HC) and full-time equivalent enrollment (FTE); on enrollment by age, race, and denomination; enrollment by specific degree programs; a listing of academic doctoral candidates by name and projected graduation date. It includes further a report of completions by degree program of off-campus programs, their number and enrollment; and of the number of first-year students. For several of these categories, e.g., age of students, 1988 was the first year in which this information was requested. The thirteen tables in this section were selected as the more significant for this first revised edition. Additional tables will be published in future editions as the computer programs are validated and as sufficient data for trend analysis becomes available. The data on enrollment are substantially more extensive than were requested prior to 1988. The definitions of the categories have been stated with great care. Together with the categories themselves, the definitions follow as closely as possible those of the Common Language for Postsecondary Accreditation: Categories and Definitions for Data Collection (1985 NCHEMS and COPA, Washington, D.C.) and the Integrated Postsecondary Education Data System (IPEDS).

Comparable Data: The 1987-88 ATS Fact Book offers comparable summary data in Tables 1-20, pp. 1-24. The detailed tables on which the summary depends are found in the latter part of the book, Tables C-1 to M, pp. 84-120. Comparable data for the broader community of higher education is readily available in the 1989-90 Fact Book on Higher Education prepared by the American Council on Education (ACE/MacMillan, New York). A basis for interesting comparisons will be found especially in Chapter II Enrollment, pp. 67-128, and in Chapter VII Earned Degrees Data, pp. 197-255.

The reader should bear in mind that the number of schools reporting enrollment data in a given category for the ATS Fact Book will be smaller at least by three than the total number of member schools. Of the nonreporting institutions, one is a consortium in which all enrollment is reported by the member institutions; the other two have become part of a larger institution while retaining their corporate identity. The larger institution reports all enrollment.

Another factor which affects comparability of data in the revised Fact Book with prior editions is the change in the guidelines for the reporting of full-time equivalent enrollment which initiated for the 1988 Annual Report Forms and which will be described in the commentary on the appropriate tables. In addition, the denominational codes were augmented substantially to reflect the diversity of membership in the Association.

Table 2.01

Number of Applicants, Acceptances, and Enrollees				
	M.A.	M.Div.	D.Min.	Other Doctorates
Total Applicants				
Fall 1989	5053	10744	1566	1661
Fall 1988				
Total Acceptances				
Fall 1989	4016	9004	1391	706
Fall 1988				
Total Enrollees				
Fall 1989	3066	7050	1141	470
Fall 1988				
Acceptance/Applicant %				
Fall 1989	79.5%	83.8%	88.8%	42.5%
Fall 1988				
Enrollment/Acceptance %				
Fall 1989	76.3%	78.3%	82.0%	66.6%
Fall 1988				

Table 2.01: Number of Applications, Acceptances, and Enrollees

This data is reported for the first time for the four major degree categories as requested of member schools in the Admissions section (A-1) of the revised ATS Annual Report Forms. The first column reports admissions for all M.A. programs, academic or professional. The second, for the Master of Divinity program, whether a three- or a four-year program; the third, for the Doctor of Ministry; and the fourth for all other doctorates including the Ph.D., Th.D., S.T.D., Ed.D., D.Miss., and the Doctor of Sacred Music. Although no data are reported in the table for 1988, it is our intention to offer this as a two-year table in the future. Longer term correlations and comparisons of admissions and completions in each major category and between the categories can be helpful to schools in tracking vocational trends. The relation of acceptances to applicants and of enrollees to applicants are of obvious interest to all admissions officers. Patterns in these ratios among denominational seminaries will vary considerably depending on the level and intensity of pre-screening of applicants by the denomination.

Definitions: The acceptance percentage is the number of applicants accepted divided by the number of applicants. The enrollment percentage is the number of acceptances enrolled divided by the number of applicants accepted. An applicant is someone formally requesting admission to a program. Acceptance is formal notification of admittance by the school. An enrollee is a student who actually enrolls after being accepted.

Table 2.02

Number Initially Enrolled Each Year						
	Sep-84	Sep-85	Sep-86	Sep-87	Sep-88	Sep-89
M.Div.						7050
M.A.						3066
D.Min.						1141
Doctorates other than D.Min.						470

Table 2.02: Number Initially Enrolled Each Year

This table makes use of the same data as Table 2.01, but it presents the data as a five-year trend table. Since this is the first year in which these statistics are published, additional years will be added from the ATS Annual Report Forms in succeeding years.

Table 2.03

Admission Policies as Reported Regarding Undergraduate GPA and GRE Scores: Fall 1989				
	M.A.	M.Div.	D.Min.	Doctorates
Number reporting a minimum GPA policy	104	134	30	13
Lowest minimum GPA required	2.00	2.00	2.00	2.00
Highest minimum GPA required	3.50	3.00	3.50	3.75
Average minimum GPA required	2.59	2.40	2.83	3.22
Number reporting a minimum GRE Policy	18	21	4	14
Lowest minimum GRE required	400.00	400.00	400.00	450.00
Highest minimum GRE required	600.00	600.00	600.00	700.00
Average minimum GRE required	480.56	476.19	500.00	567.86

Table 2.03: Admission Policies as Reported Regarding Undergraduate GPA and GRE Scores: Fall 1989

The revised ATS Annual Report Forms request information in the section on Admission Data (A-1) on the minimum requirements for the cumulative undergraduate grade point average (GPA) and for the Graduate Record Examinations (GRE). The GRE is an entrance test for graduate programs and is administered by the Educational Testing Service (ETS) of Princeton, NJ. It consists of two parts, the verbal test and the analytical test. The GRE score reported in this table is the sum of these two parts. The lowest required score, the highest and the average of all reported scores are listed. The grade point average (GPA) is calculated on a four point scale in which A=1, B=2, C=3, D=1. Any GPA reported on a different scale was converted to a four point scale for the sake of the comparative table.

Table 2.04a

Total Head Count Enrollment in Member Schools							
Year	Number Reporting	M.Div. & Interns	Th.D., STD & Ph.D.	D.Min.	Others	Total	Percent Change
1985	196	28,404	2,737	6,345	18,891	56,377	--
1986	201	28,085	2,791	6,430	19,022	56,328	-0.09%
1987	201	27,272	2,857	6,255	19,382	55,766	-1.00%
1988	202	26,620	2,968	6,074	20,085	55,747	-0.03%
1989	202	25,966	3,128	6,459	20,634	56,187	+0.79%

Table 2.04a: Total Head Count (HC) Enrollment in Member Schools

This table includes all schools, U.S. and Canadian, accredited and nonaccredited. It reports enrollment with a five-year trend. Please note that statistics for 1985, 1986, and 1987 were taken from data submitted in the pre-1988 unrevised Annual Report Forms and published in the ATS Fact Book for those respective years. The statistics for 1988 and 1989 derive from data submitted in the section on Enrollment (E-1) of the revised Annual Report Forms for the fall of 1988 and 1989. The left-hand column reports the number of schools reporting enrollment data for that year. The total enrollment is divided into four categories which reflect three of the major degree programs together with all other programs grouped in the fourth category. The M.Div. includes all students reported as enrolled in a three or four-year Master of Divinity program together with those in comparable nondegree preordination programs on EF-1, page 2, or as interns on EF-1, page 4. Interns are reported as enrolled when the internship is under the supervision of the school and is integral to the completion of the program. The Th.D., S.T.D. and Ph.D. are the traditional academic doctorates which constitute the major source for staffing of the graduate level theological schools. The Doctor of Ministry is the highest level professional degree program.

Total enrollment in theological schools was highest in 1984-85 with 56,466 students. A slow but steady decline occurred through 1988. Only in 1989 was the trend reversed. Comparable statistics for earlier years will be found in the ATS Fact Book for 1987-88, Tables 1-7, pp. 1-8.

Table 2.04b

Total FTE Enrollment in Member Schools							
Year	Number Reporting	M.Div. & Interns	Th.D., STD & Ph.D.	D.Min.	Others	Total	Percent Change
1985							
1986							
1987							
1988	202	21,537	2,022	2,380	10,863	36,802	--
1989	202	21,244	2,329	3,386	11,209	38,168	3.71%

Table 2.04b: Total Full-Time Equivalent (FTE) Enrollment in Member Schools

This table includes all schools, U.S. and Canadian, accredited and nonaccredited. It will report enrollment on a five-year trend, although the present table includes only the statistics for fall 1988 and fall 1989. We hesitate to publish FTE enrollment statistics from pre-1988 editions of the Fact Book because the guidelines for the calculating of FTE students were amended for the 1988 and 1989 ATS Annual Report Forms, a change which would necessarily affect the continuity of data. The guidelines for 1988 follow the definitions and guidelines of the Common Language for Postsecondary Accreditation, page 72, published by MCHEMS and COPA. The FTE is now calculated simply by dividing the total number of student credit hours taken by a full-time student as required for completion of a given degree program in the stated duration of that program. If a number of students taken an overload of courses, the school may well report a higher FTE than head count (HC). Instructions for pre-1988 editions of the Fact Book indicated that the FTE should not be higher than the HC count. A second change in the guidelines for reporting FTE enrollment was initiated for the fall 1989 Annual Report Forms. In light of the innate difficulty in calculating full-time equivalency for doctoral level students and in view of the lack of consistency in the way in which schools reported such enrollment, the guidelines now specify simply that for doctoral level students the full-time equivalent equals the head count of students who are actively engaged in course work, projects, and/or dissertation work. Not included are persons paying continuation fees but who are not actively engaged in course work, projects and/or dissertation work. This means that the number reported as legitimately enrolled by head count for doctoral level programs will be the same as the full-time equivalent number. The higher FTE enrollment in 1989 by comparison with 1988, an increase of 3.7 percent, is accounted for almost entirely by the higher number of FTE doctoral level enrollees. In light of this, it is understandable that the 1989 FTE data and statistics will constitute a new base for trend analysis in succeeding years. For the sources of the data and the definition of the four categories the reader is referred to the commentary on Table 2.04a which uses exactly the same categories as 2.04b.

Table 2.06

Comparable Enrollments: Same Institutions Reporting Head Count						
	Total Enrollment					
Year	Same 191 Schools #	% Change	Same #	Schools % Change	Same #	Schools % Change
1985	55,878					
1986	55,301	-1.02%				
1987	54,800	-0.91%				
1988	54,377	-0.77%				
1989	54,828	+0.83%				

Table 2.06: Comparable Enrollments: Same Institutions Reporting--Head Count

Previous editions of the ATS Fact Book have attempted to report the change in head count enrollment in a given number of institutions which have been members of the Association and have submitted Annual Report Forms for the intervening years. The present Fact Book reports statistics on the same 191 schools reporting in the fall of 1985 which were still reporting members in 1989. During that five-year period these schools suffered a decline in enrollment of 1,050 students (-1.88 percent). The overall average decline in enrollment for all member schools from 1985 to 1989 was only -.25 percent. The total number of schools reporting, however, in 1989 was greater by six than the number reporting in 1984, which may well account for the difference.

Of the 196 schools reporting in 1989, five have ceased operations or merged with other institutions. Eleven new schools were elected to membership in the Association during the same time span. The total number of ATS member schools grew by six during that period. We propose to track the "same institutions reporting" for up to 15 years and to initiate a new grouping every five years. This purpose will account for the three columns for statistics on Table 2.06. The trend analysis which flows from this table offers an accurate record of the growth or decline of a control group of institutions.

NOTES

Table 2.07

Comparison of Total Enrollment: Total Individuals and Full Time Equivalent						
Year	Headcount	% Change	FTE	% Change	FTE % of Headcount	Number Reporting
1987						
1988	55,745		36,802		66.02	202
1989	56,171	0.76	38,168	3.71	67.95	202

Table 2.07: Comparison of Total Enrollment--
Total Individuals (HC) and Full-Time Equivalent

This table will provide a three-year trend analysis of the ratio of full-time equivalent to head count enrollment for the number of member schools reporting head count enrollment for that year. These statistics for this table are taken from the total head count enrollment in Table 2.04a and the total FTE enrollment in Table 2.04b. As was explained in the commentary on Table 2.04b, the percentage change in FTE enrollment from 1988 to 1989 was an increase of 3.71 percent which was occasioned almost entirely by the change in guidelines for the 1989 ATS Annual Report Forms for the reporting of FTE enrollees for doctoral level programs. Starting with that year the full-time equivalent for doctoral level students equals the head count of such students are actively engaged in course work, projects, and/or dissertation work. Although Table 2.07 will offer a three-year trend in succeeding years, fall 1987 FTE data was not entered because of a break in continuity between 1987 and succeeding years in the guidelines for the calculation of a full-time equivalency. These changes are narrated in detail in the commentary on Table 2.04b. With the above qualifications in mind, somewhat comparable data can be found in the ATS Fact Book for 1987-88 in Table 4, page e.

Table 2.10: Total Enrollment by Degree Types--HC and FTE

This table reports the total enrollment both by head count and full-time equivalency for 1988 and 1989 distributed among eight principal categories of programs in which the schools report enrollment on the ATS Annual Report Forms in Sections EF-1 and 2. The changes in the percentage of enrollment in each type of program in relation to total enrollment is a matter of great importance both to the schools and to the denominations for the purpose of long-range planning. Table 2.12 complements this table in reporting both head count and FTE enrollment in addition by the specific degree programs within each category. The statistics for Tables 2.10 and 2.12 are derived from the ATS Annual Report Forms (EF-1) for the fall of 1988 and the fall of 1989. They are based on the data submitted by the schools in the following categories of the enrollment form (EF-1): The first category "Professional/Academic 1 or 2 years Post-Baccalaureate" includes all the M.A. programs listed on page 1 of the EF-1 Report Form. The second category "Professional 3 Years Post-Baccalaureate" includes all enrollees reported on EF-1, page 2, columns A, B, C, and D. The third category "Professional 4 Years Post-Baccalaureate" includes all enrollees reported on EF-1, page 2, columns E, F. G, and H. The fourth category "Professional Post-Baccalaureate Doctoral Programs" includes all enrollees reported on EF-1, page 3, columns A through H (D.Min., D.Miss., Ed.D., D.Sac.Music). The fifth category "Certificate and Diploma Programs" includes all enrollees reported on EF-1, page 4, columns A and B. The sixth category "Special/Unclassified" includes all enrollees reported on EF-1, page 4, columns C and D. The seventh category "Interns" includes all those reported on EF-1, page 4, columns E and F. The last category "Academic Post-M.A./M.Div. programs includes all those reported on EF-1, page 4, columns A through F (includes Th.M., Th.D., and Ph.D.). Please note that the head count enrollment reported in Table 2.10 is slightly lower than that reported in Table 2.20 because Table 2.10 includes several corrections of the original reports submitted by the member institutions.

Table 2.10

Total Enrollment by Degree Types

Table 2.12: Enrollment by Degree--HC and FTE

This table reports the enrollment for all member schools, both Canadian and U.S., accredited and nonaccredited, for the fall of 1988 and 1989. With the data from succeeding years this table will offer a four-year trend for each degree and each category. The listing follows the order in which the degree programs and other programs are listed in the enrollment section (EF-1) of the ATS Annual Report Forms for 1988 and 1989. Although most categories will be obvious to the reader, the distinction in the M.A. programs is worth noting. The M.A./M.A.R./M.T.S. represents the two-year academic master's level programs which may be research oriented or "general academic" without the focus on research methodology. This reflects the fact that some seeking a master's degree of this kind will be preparing for doctoral level work whereas others will have a variety of reasons for seeking an advanced level of preparation in theology. The next category, M.A. in (Special) is the professional M.A. two-year program which helps prepare people for a specialized ministry in contrast with the Master of Divinity (M.Div.) which is a basic three-year program of general preparation for the full range of ministry. The professional M.A. is always qualified in its title by the area of specializations, e.g., M.A. in Pastoral Counseling.

Somewhat comparable summary data will be found in the ATS Fact Book for 1987-88, Tables 5 and 7, pp. 5-8; and for each school in Table B-2, pp. 64-83. The 1988-89 revised Fact Book is the first one in which the complete listing of enrollment in the individual degree programs is reported in the categories of the revised Annual Report forms.

NOTES

Table 2.20: Enrollment Summary by Degrees, Gender, and Race--Head Count

This table presents in summary form enrollment by gender and race in all the major categories of programs and in the specific degree and nondegree programs as reported by member schools in the ATS Annual Report Forms for fall 1989. The data are found in the section entitled Enrollment (EF-1) of the Report Forms. Comparable data from the ATS Fact Book for 1987-88 will be found in summary form in Tables 8-18, pp. 8-21. These tables present only the broader categories of degree and nondegree programs. The more detailed information regarding enrollment in these categories by specific degree and nondegree programs will be found in the tables in the latter part of the 1987-88 Fact Book: C-2 for enrollment of Blacks; C-3 for enrollment of women; C-4 for enrollment of Hispanic/Americans; and C-5 for enrollment Pacific/Asian Americans (pp. 85-88). A major difference between the 1988 forms and pre-1988 forms is that the revised 1988 Annual Report Forms and all later forms provide a separate category for Non-Resident Alien or Visa students. This group constituted 6.4 percent of total head count enrollment for the fall of 1989. In prior years they were simply grouped as "all others." The distinction was not as clearly drawn as at present.

Definitions: The fall 1988 and 1989 ATS Annual Report Forms have followed the definitions of race/ethnic identification found in A Common Language for Postsecondary Accreditation published by NCHEMS and COPA.

a) Black, Not of Hispanic Origin. A person having origins in any of the Black racial groups of Africa.
b) Hispanic. A person of Mexican, Puerto Rican, Cuban, Central of South American, or other Spanish culture or origin, regardless of race.
c) Asian or Pacific Islander. A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands. This area includes, for example, China, Japan, Korea, the Philippine Islands, Samoa, India, and Viet Nam.
d) American Indian, Alaskan Native, or Inuit. A person having origins in any of the original peoples of North American and maintaining cultural identification through tribal affiliation or community recognition.
e) White Not of Hispanic Origin. A person having origins in any of the original peoples of Europe, North African, or the Middle East.
f) Nonresident Alien or Visa. A person who is not a citizen or national of the home country of the institution and who is in the country on a visa or temporary basis and does not have the right to remain indefinitely.

Table 2:20 (continued)

Comparable Data:

Women: The 16,526 women enrolled (HC) in ATS member schools in the fall of 1989 constituted 29.4 percent of total enrollment and an increase in numbers of 1.6 percent from 1988. In 1974 there were 5,255 women or 14.3 percent of total enrollment; and in 1979 there were 10,204 women or 21.1 percent. There has been a steady growth in numbers and percentage every year, although 1989 reported the smallest growth both in numbers (+268) and in percentage of total enrollment (+1.6 percent).

Blacks: The 3,961 Blacks (HC) enrolled in ATS member schools in the fall of 1989 constituted 7.30 percent of total enrollment, an increase of 8.3 percent from 1988. In 1974 there were 1,246 Black students enrolled, or 3.4 percent; in 1979 there were 2,043, or 4.2 percent. The intervening years have seen a steady growth in Black enrollment which averaged +6.3 percent per year for the past 5 years. The year 1989 reported a growth of 303 students, 8.3 percent more than in 1988. There is reason for encouragement in these statistics, although national data indicate that Blacks in the 18-24 year age bracket constituted 14.7 percent of total population for that group (1989-90 Fact Book on Higher Education, ACE, page 12).

Hispanic Americans: The 1,490 Hispanic Americans enrolled in ATS member schools in the fall of 1989 constituted 2.7 percent of total enrollment, an increase of 3.3 percent over 1988. In 1974 there were 448 Hispanic American students, or 1.3 percent of total enrollment; in 1979 there were 822, or 1.7 percent of total enrollment. The intervening years have seen a steady but slow growth in the enrollment of this group. The year 1989 reported a growth of 47 students, 3.3 percent more than in 1988. With only 2.7 percent of total enrollment this group remains sorely underrepresented in member schools.

Asian/Pacific Islander: The 2,065 Pacific/Asian students enrolled in ATS member schools in the fall of 1989 constituted 3.7 percent of total enrollment, an increase of 5.3 percent from 1988. In 1979 there were 577 Pacific/Asian students enrolled, or 1.2 percent of total enrollment. The intervening years have seen a very rapid growth in the enrollment of this group which averaged 14.2 percent per year. The determination of this group to provide for itself an educated ministry is obvious in these statistics.

Table 2.23: Denominational Affiliation of Current Enrollment--Head Count

This table reports the denominational status of enrollees in two categories. The first is First Professional Degrees which includes all those who are enrolled in the basic 3 or 4 year first professional degree programs which in most, but not all, denominations lead to full-time ordained ministry. This category includes enrollees reported on the ATS Annual Report Forms for 1989, EF-1, page 2, columns A through 8. The category also includes interns reported on EF-1, page 4, columns E and F, where interns are reported if they are in programs under the supervision of the school and where the internship is integral to the completion of the degree program. The other category, "All Others" embraces all students enrolled in other programs whether other degrees, certificates, diploma programs, or special/unclassified. The number of schools in which students are enrolled in each category are listed in the column to the right of that category. A fourth column on the far right of the page lists the number of unduplicated schools in which students of that denomination are listed.

The number of denominations listed in the revised ATS Fact Book is more extensive than the listing provided in pre-1988 editions of the Fact Book. The editors trust that the expanded listing will better represent the diversity of membership in the Association. The purpose of a separate listing of those enrolled in first professional programs for full-time ministry, whether degree or nondegree students, is to offer the denomination as accurate an accounting as possible of the number enrolled from that denomination who would be preparing for full-time ministry. In this respect the revised edition of the ATS Fact Book for 1988-89 and 1989-90 has taken a substantial step beyond the statistics provided in earlier editions of the Fact Book.

NOTES

Table 2.29

Total Completions from Member Schools							
Year	Number Reporting	M.Div. & Interns	Th.D., STD & Ph.D.	D.Min.	Others	Total	Percent Change
1987							
1988	199	6540	334	930	4688	12492	
1989	200	6503	345	951	4848	12647	1.2%

Table 2.29: Total Completions from Member Schools

This table reports the number who have completed degree programs and were graduated from all member schools. This includes all U.S. and Canadian schools, both accredited and nonaccredited. The statistics record completions for the "number of schools reporting" for each year. Since the number of schools which reported enrollment data for each year was 202, the number actually reporting completions is close to the total. Statistics for Tables 2.29 and 2.32 are taken from the Completions form (C-1) of the ATS Annual Report Forms for fall 1988 and fall 1989. Although no completions are reported from pre-1988 editions of the Fact Book because of the lack of exact comparability with earlier data in one or the other category, the table is intended in succeeding years to offer a three year trend with regard to completions. The M.Div. category includes all those graduating with this degree as reported in C-1, page 2, columns C, D, G, and H, together with those who received the M.Div. upon completion of their internship as reported on page 4, columns E and F. The Th.D., S.T.D., and Ph.D. degree completions are reported again on C-1, page 5, columns C, D, E, and F. The Doctor of Ministry completions are reported on C-1, page 3, columns A and B. The category "others" includes all the M.A. level program and the other doctoral level program completions.

Comparable data from the ATS Fact Book for 1987-88 will be found in summary form in Tables 19 and 20, pp. 22-24. The gradual decline in the number of graduates from the M.Div. program which was first observed in 1985 has continued through 1989 with a reported decrease of 536 graduates over the five-year period, a decline of 7.6 percent. The number of Doctor of Ministry graduates has continued in the same range over the past decade varying between 950 and 1,025 per annum. As the number of enrollees in the academic doctoral level programs continues to grow year by year, so does the number of graduates. The reader may wish to compare Table 2.29 on completions with Tables 2.04a and 2.04b which report both head count and FTE enrollment in the same categories and with the same format.

Table 2.32: Completions by Degree Programs

This table reports completions by individual degree programs together with the certificate and diploma programs. Both the format as well as the program categories and degrees are parallel to those of Table 2.12 which reports both head count and FTE enrollment in the individual degree programs as well as in certificate and diploma programs. All statistics are drawn from the section on Completions (C-1) of the ATS Annual Report Forms for the fall of 1988 and of 1989. Table 2.32 follows in its listing of the categories and programs the same order as was followed by member schools in reporting these data in section C-1 which covers the full range of completions. Comparable specific data on completions by degree and nondegree programs can be found in the ATS Fact Book for 1987-88, Tables F1-5, G1-5, H1-5, pp. 102-116.

Table 2.32

NOTES

CHAPTER III: PERSONNEL CONPENSATION

Introduction

Chapter III consists of seven tables which report data on compensation for administrators and faculty. In prior editions of ATS Fact Book this information was contained in Tables MN, OO, SS for faculty compensation. Comparable summary data on compensation in the 1987-88 ATS Fact Book will be found in Tables 28-37, pp. 34-41. Comparable data for all of U.S. higher education can be found in the 1989-90 Fact Book on Higher Education published by the American Council on Education/Macmillan Publishing Company, New York. The revised edition of the ATS Fact Book is based on information supplied by the schools in the ATS Annual Report Forms, sections on Salary (S-1 and S-2) for administrative and faculty salaries obtaining for the academic years 1988-89 and 1989-90. The data are reported in detail for the current year 1989-90. Salaries both for administrators and of faculty are reported for the most part in categories and groupings which sound familiar and are parallel to those of prior years. Nonetheless, with the revised Annual Report Forms, a more refined and careful presentation and analysis of compensation data has become possible. Readers should keep the following in mind:

A. For administrative staff, twenty-two positions are now reported rather than eight as in former editions.

B. For faculty salaries the position of "lecturer" has been added to the earlier listings of professor, associate professor, assistant professor and instructor.

C. Salaries are compared on the basis of size of school, accredited or nonaccredited status, U. S. or Canadian location of school, highest degree level--M.Div./Th.M.; D.Min.; Ph.D./Th.D. They are also compared on the basis of denominational groupings provided the denomination sponsors four or more schools. The last table compares university/college related and independent/freestanding schools.

D. Salaries are analyzed in terms of contract salary--including contributed services, housing where provided, pension benefits, and other benefits chiefly medical. A separate comparison is made of contract salaries which include housing and those which do not.

E. The order in which salaried positions are reported is an alphabetical order determined by the computer program. To facilitate the use of these tables a copy of the glossary of administrative and faculty positions in the order used by member schools for reporting on the 1989 Annual Report Forms has been appended to this chapter. The more extensive listing of administrative positions requested in the 1988 Annual Report Forms was reduced in number for the 1989 forms. Only the 1989 listing is reported in the revised Fact Book. Several of the coded listings for 1988 provided too few responses to offer a basis for trend analysis or they proved ambiguous in designation. The 1989 Glossary List will be used for all future Fact Books.

F. The Comparative reporting of salaries by eight major geographical regions has been discontinued except for the comparison of U. S. and Canadian salaries. On further analysis of the regional categories we discovered that they have not proved that useful in establishing salary scales. Differences within each region proved far greater and more significant than the quite limited difference from one region to another. We found that schools tended to establish a "regional grouping" on a more complex basis than simple geography, with the exception of Canada and the U. S.

NOTES

Table 3.12: Trends in Total Compensation Averages--U. S. Accredited Schools

This table reports average compensation for administrators and faculty for U. S. accredited schools only. Averages are for the fall, 1988 and 1989 salaries. The percentage change from 1988 to 1989 is offered first in relation to the exact dollar amounts reported by the schools and is designated as the "nominal change." It is then offered secondly with allowance made in the percentage figure for the increase since the previous year in the Consumer Price Index (CPI) as recorded for July 1, 1989. This represents non-inflated or real dollars and is designated as the "real change." The inflation rate for 1989 was + 4.98 percent. This was subtracted from the reported "nominal change" in calculating the "real change" from the prior year.

Sources: Statistics for this report are taken from the Administrative and Faculty Salary sections (S-1 and S-2) of the ATS Annual Report Forms for the fall of 1988 and the fall of 1989. The order of listing of administrative and salary categories is alphabetical. Readers are invited to refer to the 1989 Glossary for full-time administrators and faculty. A copy of this is appended to Chapter III for the order in which member schools reported this data. Total compensation includes the contract salary, contributed services, housing allowance (if any) or the rental value of housing provided, pension payments, and other benefits such as insurance, medical coverage, and educational allowances for children.

Comparable Data: Somewhat comparable data for prior years will be found in Tables 28 to 37 on pages 35 to 41 of the ATS Fact Book, 1987-88. The reader should note, however, that the tables from prior editions of the Fact Book include only non-Roman Catholic U. S. and Canadian schools. All statistics are reported in dollars (assumed to be equivalent) with no provision for converting Canadian to U. S. dollars or vice versa. The CPI which was used in earlier editions was only the CPI for the United States. Readers desiring to compare 1988 with 1987 may use the July 1, 1988, cost of living index. The CPI for the U. S. was + 4.1.3 percent; the Canadian CPI was + 3.8 percent.

More detailed tables for administrative and faculty salaries will be found in the ATS Fact Book for 1987-88. Tables NN through VV on pages 150 to 164 report data on administrative and faculty salaries according to size of school, accredited or nonaccredited membership status, relation to university, relation to clusters, racial character, denominational affiliation, geographic region, and highest level of degree offered. Note that some of these tables excluded Roman Catholic schools.

Table 3.12

Trends in Total Compensation Averages - U.S. Accredited Schools

Position	1988 Amount	1988 Number	1989 Amount	1989 Number	Nominal Change	Real Change

Consumer Price Index Change					5.0%	
Net Real Change in Compensation					-2.1%	

Table 3.12a: Trends in Total Compensation Averages--Canadian Accredited Schools

This table reports average compensation for administrators and faculty for Canadian accredited schools only. Averages are for the fall of 1988 and of 1989 salaries. The percentage change from 1988 to 1989 is offered first in relation to the exact dollar amounts reported by the schools and is designated as the "nominal change." It is then offered secondly with allowance made in the percentage figure for the increase since the previous year in the Consumer Price Index for Canada (CPI) as recorded for July 1, 1989. This represents non-inflated or "real dollars" and is designated as the "real change." The inflation rate for Canada as of July 1, 1989, was + 5.4 percent. This will be subtracted from the reported "nominal change" in calculating the "real change."

Sources: Statistics for this report are taken from the administrative and faculty salary sections (S-1 and S-2) of the ATS Annual Report Forms for the fall of 1988 and 1989. The order of listing the administrative and faculty categories is alphabetical. Readers are invited to refer to the 1989 Glossary for full-time administrators and faculty which is appended to Chapter III for the order in which member schools reported administrative and faculty data. Total compensation includes the contract salary, contributed services, housing allowance (if any) or the rental value of housing provided, coverage, and educational allowances for children.

Comparable Data: Somewhat comparable data for prior years will be found in Tables 28 to 37. pages 35-41 of the ATS Fact Book, 1987-88. The reader should note, however, that the tables include only non-Roman Catholic Canadian and U. S. schools. All statistics are reported in dollars with no provision for converting Canadian to U. S. dollars or vice versa. The CPI used was only the CPI for the United States. Readers desiring to compare 1988 with 1987 data may use the Consumer Price Index for July 1, 1988. The Consumer Price Index for Canada was + 4.13 percent; for the United States + 3.18 percent.

More detailed tables for administrative and faculty compensation will be found in the ATS Fact Book 1987-88 in Tables NN through VV, pages 150-164. Some of the tables exclude Roman Catholic schools. Data is reported according to the size of the school, accredited or nonaccredited membership status, relation to university, relation to cluster, racial character, denominational affiliation, geographic region, and highest degree level offered. Some of the tables exclude Roman Catholic schools. Data specific to Canadian schools will be found in the listing of administrative salaries for Canada as one of eight geographic regions in Table PP on page 154; faculty salaries for Canada as one of eight geographic regions will be found in Table SS on page 158.

Table 3.13: Trends in Total Compensation Averages--All Nonaccredited Schools in U. S. Dollars

This table reports compensation averages for all nonaccredited schools, Canadian and U. S. It includes associate and candidate members. Canadian and U. S. schools are grouped together in this table because of the relatively small number of schools whose reports constitute the data base. Canadian dollars have been converted to U. S. dollars at the rate obtaining as of July 1 of each of the reporting year: for 1988, $.8124 US and for 1989, $.8412 US.

The sources of data are the salary forms (S-1 and S-2) of the ATS Annual Report Forms for 1988 and 1989. The consumer price index which was used to calculate the percentage change is the CPI for the U. S. as of July 1, 1889, which was + 4.98 percent.

Table 3.17: Compensation With and Without Housing Benefits, Salaries and Other Benefits--All Schools in U. S. Dollars

This table recognizes the variety of salary patterns for the academic year in member schools, some of which include housing benefits and others which do not. The total salary as reported is the sum of several components. The first is that of contract salary which as reported here includes any contributed services if they obtain. Contributed services are an equivalent dollar value calculated for services rendered by a person to a school for which no monetary reimbursement is accepted. They may constitute a portion or all of the equivalent contract salary which would normally be paid for a given position. Housing includes a housing allowance or the rental value of housing provided. This is not the pastor's nonreportable tax reduction for housing. The caption "Benefit" reports separately the school's contribution to pension, and then other benefits which include life insurance, medical coverage, educational benefits for dependents, auto furnished by the institution, and others paid by the institution. Each category of the components of the total salary reports the average for the number of schools reporting in that category. This presents a far better norm for comparison than Tables NN through VV of the ATS Fact Book for 1987-88, pp. 150-164, which reported the average housing benefit for all schools whether they reported such a benefit or not.

The statistics for this table derive from the school reports in the section on salaries (S-1 and S-2) of the ATS Annual Report Forms for the fall of 1989. This table includes all schools accredited and nonaccredited, Canadian and U. S., with Canadian dollars converted to U. S. dollars at the rate obtaining on July 1 of the reporting year. The report includes all categories of administrators and of faculty in alphabetical order. The full titles of administrators and faculty are identified in the order used by the reports filed by member schools in the Glossary from the 1989 Annual Report Forms which is appended to Chapter III.

Table 3.18: Compensation Comparisons by Size, Accredited or Nonaccredited Status, Country, and Highest Degree--All Schools in U. S. Dollars

This table reports compensation comparisons in terms of contract salary including contributed services; contract salary plus housing; and additional benefits paid by the school. It also details the average and median contract salary, the total average salary and the 25th percentile, median and 75th percentile of the total salary where median stands for the point at which 50 percent of schools are below that point and 50 percent above. No salary is reported if there is only one person reported in a category. If only two or three are reported, the percentile distribution and median are not reported in order to protect privacy of individual salaries.

The categories which are used for comparison are those most commonly used by schools for planning purposes. They include a distribution (a) into six groups by size of school, based on reported FTE enrollment; (b) by the accredited or nonaccredited status of the school (nonaccredited includes associate and candidate members); (c) by country, i.e., Canada or U. S.; (d) highest degree offered--the Master of Divinity/Master of Theology; Doctor of Ministry; Ph.D./Th.D. Academic Doctorate. Tables 3.19 and 3.21 with comparisons by denominational groupings and by nonuniversity affiliation complement the present table by offering additional bases for comparison.

Statistics are calculated in U. S. dollars with Canadian dollars converted to U. S. dollars at the rate obtaining for July 1, 1989 ($.8412 US). The data are based on the salary section (S-1 and S-2) of the ATS Annual Report Forms for the fall of 1989 which report salaries for the 1989-90 academic year. Somewhat comparable data may be found in the ATS Fact Book for 1987-88 in Tables NN through VV, pp. 150-164, with the restriction that many of these tables exclude non-Roman Catholic schools and that no provision is made for the conversion of Canadian dollars to U. S. dollars or vice versa.

Table 3.19: Compensation Comparisons by Denomination of School-- Groups with Four or More Schools

This table complements Table 3.18 in that it again reports compensation for administrators and for faculty for comparison purposes, but now based on the denominational affiliation of the school. Only denominations with four or more schools are listed. There are fourteen groupings--three for Canada and eleven for the U. S. Since the table distinguishes U. S. from Canadian denominational groupings, Canadian dollars are reported as Canadian and have not been converted. Schools declaring themselves as non- or interdenominational U.S.A. constitute a distinct U. S. grouping. Other small denominational school clusters are grouped as "all other."

No salary is reported if there is only one person reported in a given category. If only two or three are reported, the percentile distribution and the median are not reported in order to protect the privacy of individual salaries.

The salary information derives from the salary forms (S-1 and S-2) of the ATS Annual Report Forms for the fall of 1989. The country and denominational affiliation are taken from the ATS school master file as reported by the schools themselves. Somewhat similar information for prior years will be found in the ATS Fact Book for 1987-88 in Tables OO and RR, pp. 152 and 157.

Table 3.21: Distribution of Administrative and Faculty Compensation in Thousands, Comparing University and Nonuniversity Affiliated School

This table presents a comparison of total salary figures in thousands of dollars for university/college affiliated schools and for nonuniversity affiliated schools. The total salary here reported includes contract salary with contributed services if they obtain, housing, pension and other benefits. The comparison is made first for Canadian schools in Canadian dollars and then for U. S. schools in U. S. dollars. The school is considered university or college affiliated if it is constituted as a school or department within the structure of a larger university or college which has at least two other graduate level schools or departments. The university/independent status of all member schools is listed in Table 1.01 of Chapter I.

The data for this table derived from the section on salary (S-1 and S-2) of the ATS Annual Report Forms for the fall of 1989. Salaries are those obtained for the 1989-90 academic year. Faculty salaries are those reported for full-time faculty, contracted on a nine/ten month or eleven/twelve month basis, regardless of the number of payment periods.

CHAPTER III APPENDIX:

SALARY DATA
FULL-TIME ADMINISTRATORS AND FACULTY
FALL 1990
GLOSSARY

Administrative Code. A code identifying professional staff positions in school administration.

CEXEC	Chief Executive Officer
EXCVP	Executive Vice President
VPADM	Vice President of Administration
ACDVP	Academic Vice President/Academic Dean
DEVOF	Chief Development Officer
DEVPS	Other Development Professional Staff
DGRDS	Director of Graduate Studies
DMIND	Director of D.Min. Program
DSTUD	Dean of Students
FINOF	Chief Financial Officer
RECOF	Recruitment Officer
ADSOF	Admissions Officer
REGOF	Registrar
SYSOF	Director of Information Systems
FEDOF	Director of Field Education
FORMD	Director of Formation
HDLIB	Head Librarian
LIBPS	Other Librarian Professional Staff
ALMOF	Alumni Officer
STSOF	Director of Student Services
CEDOF	Director of Continuing Education

Faculty Rank Code. The institutionally designated official title or grade of a faculty member.

LECT **Lecturer:** Faculty designated by the rank of lecturer.

INST **Instructor:** Faculty designated by the rank of instructor.

ASTP **Assistant Professor:** Faculty designated by the rank of assistant professor.

ASCP **Associate Professor:** Faculty designated by the rank of associate professor.

PROF **Professor:** Faculty designated by the rank of professor.

CHAPTER IV. FINANCES: TUITION COSTS, REVENUES AND EXPENDITURES

Introduction

This section consists of fourteen tables which provide the overall financial information for the ATS schools of theology as reported in the fall of 1988 and 1989 in the ATS Annual Report Forms. They will provide revenue and expenditures together with per-student costs for the two preceding years of 1987-88 and 1988-89 based on the audits of those years and as reported in the fall of 1988 and 1989.

These tables correspond to the areas covered in Tables AA-JJ of the 1987-88 ATS Fact Book. The tables for average tuition costs and degree program costs are printed here for the first time. Member schools have requested this additional information.

Further refinements of data on revenue and expenditures including an analysis of significant ratios are planned as the data submitted by the schools is evaluated for subsequent annual editions of the ATS Fact Book. These will include a chapter on Development covering the various sources of giving and grants which contribute significantly to the support of member schools.

Table 4.01: Tuition and Fees

The data for these tables were submitted by member schools in the ATS Annual Report Forms in the section called Institutional Characteristics (IC-1). Tuition costs and fees have not been published in previous Fact Books. They are given for the full academic year 1989-90 and are the figures published by the schools themselves, even if the school publishes a discount. This qualification is important for understanding the low tuition costs listed for some of the heavily subsidized educational programs in schools such as the Southern Baptist seminaries and some of the Roman Catholic seminaries. University related schools will generally report higher tuition costs since the divinity school of the university will most often follow the university tuition scale.

Tuition costs are listed for the principle degree programs of member schools, namely, the Master of Divinity (M.Div.) and the academic doctorates (Ph.D./Th.D.) together with the Doctor of Ministry program (D.Min.). Costs for the Master of Divinity and the academic doctorates assume a full-time student taking the normal course load. Costs for the Doctor of Ministry program are given for the entire program which is designed for a minimum of three years, each year of which will have a different level of academic concentration and correspondingly different tuition costs.

The table includes all member schools both accredited and non-accredited. Canadian costs are in Canadian dollars and U.S. schools are in U.S. dollars. The M.Div. is the basic program of preparation for full-time ministry for almost all the member theological schools. Costs for M.A. programs will generally be in the same range. The academic doctorates will be priced at a different level to reflect the substantially higher costs to the school. The D.Min. as the highest professional degree, which usually assumes that the candidate is actually engaged in ministry will have its own pattern of costs reflecting often the extent to which the school is able or willing to absorb the direct or indirect costs of the program.

Table 4.01

Tuition and Fees

	Master of Divinity Tuition	Master of Divinity Fees	Ph.D./Th.D. Degrees Tuition	Ph.D./Th.D. Degrees Fees	Full Program Doctor of Ministry Tuition & Fees

By Univ. Relation									
University	$6,369	$6,570	3.15%	$8,067	$7,790	-3.44%	$8,243	$7,917	-3.95%
Independent	$3,172	$3,616	14.00%	$4,745	$4,632	-2.38%	$4,105	$4,675	13.88%

Table 4.05, 4.06, 4.07: Average Tuition Charges

These three tables report the average tuition charges for the same three categories of programs as were reported in Table 4.01. The distribution, however, is by the full-time equivalent enrollment (FTE) in each program for six groupings of schools increasing in size. The second distribution is between independent or free-standing schools and those which are an integral part of a university or college. The designation "university related" is reserved to those theological schools affiliated with a larger school which has at least two graduate level schools or departments. These tables include all member schools, both accredited and nonaccredited. Charges are reported in U. S. dollars with Canadian dollars converted to U. S. dollars at the rate for the reporting period as of July 1 of the reporting year.

This table is a two-year table with a report of the percentage of change from the previous year. The statistics are again taken from the ATS Annual Report Forms, the section entitled Institutional Characteristics (IC-1). It is interesting to note the higher charges of the university related schools which frequently followed the university scale. Note that the category of schools over 1,000 includes several of the major Southern Baptist schools with heavily subsidized tuition.

Table 4.08: Revenue and Expenditures
Per FTE Student

A matter of constant concern to theological school administrators and to denominational offices is the per-student cost to prepare professional leadership for the churches. These costs are normally calculated on the basis of the number of full-time equivalent students. The FTE enrollment serves as a better base than the head count enrollment which will include a varying percentage of part-time students. These part-time students have been reduced to their equivalent of full-time students according to the sum of the percentages of time which each spent in the program.

Table 4.08, 4.10, 4.14a, 4.23, 4.25, and 4.26 all report the FTE financial data either in terms of dollar costs or percentage costs by the different line items together with the total costs. Only Current Fund revenue and expenditures are reported in these tables.

Table 4.08 reports both revenue sources and expenditures per FTE student for all students, both U. S. and Canadian, accredited and non-accredited. The figures are reported in the fall 1989 Annual Report Forms, the section entitled Finance (F-1) which are based on the audited figures for the 1988-89 academic year. Please note the following:

A. Each source of revenue and each line item for expenditures is reported with the average amount for the number of schools reporting more than zero amounts (a non-zero amount) for that line. The number of schools reporting is clearly indicated.

B. Please note that the total per-student revenue and the subtotal per student educational and general expenditure together with the total per student expenditure are likewise based on the number of schools reporting. These totals are not the sum of the averages of all the average revenue and expenditure line items because the averages for the line items are based on the smaller number schools reporting non-zero amounts in each line. If the average amount for each line item were based on the total 189 schools reporting, the amount would obviously be less. In our judgment the reporting of the individual line averages for the schools reporting non-zero amounts for that line was of more interest to schools doing comparative analysis of their own revenue and costs.

These statistics are again based on the fall 1989 Finance (F-1) forms of the Annual Report Forms. Total revenue reflects F-1, Part A, Line 9. Subtotal educational and general expenditure reflects F-1, Part B, Line 14. The total expenditures reflects F-1, Part B, Line 18. Most comparisons of per-student costs are based on the FTE costs of educational and general expenditures. Most schools try to have auxiliary enterprise expenditures covered directly by revenues from their operation. For a good number of schools which do not provide residence or food services, auxiliary enterprises are not a significant expense line.

C. Revenue and expenditures are recorded in U. S. dollars. Canadian dollars have been converted to U. S. dollars as of the exchange rate obtaining as of July 1 of the reporting year. (1989)

D. The line items for revenue and expenditures follow the guidelines of the National Association of College and University Business Officers (NACUBO). With the exception that the ATS Annual Report Forms call for a separate reporting of library expenditures from the category of academic support in which it is included in the NACUBO guidelines. This has been the long-standing practice of ATS which uses this as one way of monitoring the graduate level institutions which constitute its membership. Definitions of Accreditation, 1985, published by the National Center for Higher Education Management Systems (NCHEMS) of Boulder, CO and the Council on Postsecondary Accreditation (COPA) of Washington, DC. pp. 63-71.

Table 4.08

Changes in Financial Data Per Full Time Equivalent Student (U.S. Dollars) All Schools		
	1988-89	
	Number of Schools Reporting Non-Zero Amount	Average Amount
Revenue		
Tuition and Fees	198	$3,748
Govt. Grants, Contracts, and Appropriations	58	$523
Gifts and Grants from Religious Organizations	170	$3,117
Gifts and Grants from Individuals & Others	189	$2,732
Value of Contributed Services	51	$1,991
Endowment/Investment Income	180	$3,348
Auxiliary/Ancillary Enterprises	163	$2,198
Other Sources	181	$835
Total Revenue	199	$15,560
Expenditures		
Educational and General		
Instruction & Net Acad. Support	198	$5,148
Research	29	$375
Public Service	43	$721
Library	192	$1,035
Student Services	160	$509
Admissions	117	$367
Inst. Support/Admin & Gen	196	$3,293
Op. & Maint of Plant	196	$1,529
Scholarships & Fellowships	167	$1,631
Mandatory Transfers	51	$523
Nonmandatory Transfers	84	$1,214
Subtotal: Educational and General	199	$14,199
Auxiliary/Ancillary Enterprises Expenditures	156	$2,155
Total Expenditure	199	$16,052

Table 4.10

Revenue Sources Expressed as a Percentage of Total Revenue - All Schools		
	1988	1989
Revenue		
Tuition and Fees	24.3%	24.0%
Govt. Grants, Contracts, and Appropriations	1.4%	1.1%
Gifts and Grants from Religious Organizations	18.0%	17.7%
Gifts and Grants from Individuals & Others	17.0%	17.2%
Value of Contributed Services	2.1%	2.0%
Endowment/Investment Income	19.0%	20.5%
Auxiliary/Ancillary Enterprises	12.6%	12.4%
Other Sources	5.6%	5.1%

Table 4.10: Revenue Sources Expressed as a Percentage of Total Revenue--All Schools

This table provides a distribution of revenue for each line item as a percentage of total revenue. The percentage for each line item is based on all schools, accredited and nonaccredited. Data is recorded for two years, the fall of 1988 and 1989. It represents audited financial reports for the two prior fiscal years, 1987-88 and 1988-89. Previous editions of the Fact Book provided comparable data in dollars but not in percentages. For purposes of strategic planning, the percentages of the several line items are most significant.

The reader can readily convert the percentage to dollars by multiplying the total per FTE student revenue from Table 4.08 ($15,560) by the percentage in each line item. The source of data for this table is the same as for Table 4.08. All data are reported in U. S. dollars with Canadian dollars converted to U. S. dollars at the rate obtaining on July 1 of 1989.

Table 4.14

Revenue Sources Expressed as a Percentage of Total Revenue - Roman Catholic and Non-Roman Catholic Schools		
	Roman Catholic	Non-Roman Catholic
Revenue		
Tuition and Fees	25.6%	23.8%
Govt. Grants, Contracts, and Appropriations	1.4%	1.1%
Gifts and Grants from Religious Organizations	18.1%	17.6%
Gifts and Grants from Individuals & Others	13.4%	17.8%
Value of Contributed Services	12.9%	0.3%
Endowment/Investment Income	10.6%	22.0%
Auxiliary/Ancillary Enterprises	12.2%	12.4%
Other Sources	5.6%	5.0%

Table 4.14: Revenue Sources as a Percentage of Total Revenue--Roman Catholic and Non-Roman Catholic Schools

This table provides a separate distribution of revenue sources for Roman Catholic theological seminaries and for Non-Roman Catholic schools. The separate tables reflect the average higher percentage of contributed services in the Roman Catholic schools and lower percentage of endowment income. Contributed services are often referred to as "living endowment." It is interesting to note that contributed services plus endowment in the Roman Catholic schools comes to almost the same percentage of revenue as endowment income in the other theological schools. The trend, however, for the past decade has been a steady decline in the percentage of contributed growth of a small percentage of contributed services in some of the other schools which benefit from the services of faculty and others who have taken retirement or from the contributed services of pastors and other professional people in the immediate area of the school. The source of the data for this table is the same as for Table 4.08.

Table 4.23

Expenditure Sources Expressed as a Percentage of Total Expenditures and Mandatory Transfers - All Schools		
	1988	1989
Expenditures		
Educational and General		
Instruction & Net Acad. Support	32.5%	32.1%
Research	0.4%	0.3%
Public Service	0.8%	1.0%
Library	6.3%	6.2%
Student Services	3.1%	2.8%
Admissions	1.5%	1.6%
Inst. Support/Admin & Gen	20.2%	20.4%
Op. & Maint of Plant	9.4%	9.5%
Scholarships & Fellowships	4.0%	4.2%
Mandatory Transfers	0.6%	1.1%
Nonmandatory Transfers	9.1%	9.3%
Subtotal: Educational and General	88.0%	88.5%
Auxiliary/Ancillary Enterprises Expenditures	12.0%	11.5%

Table 4.23: Expenditure Sources as a Percentage of Total Expenditures--All Schools

This table provides a distribution of expenditure sources as percentage of total expenditures. The expenditures include both mandatory and non-mandatory transfers in the total educational and general expenditures together with auxiliary enterprise expenditures. The data are presented for two years for the sake of comparisons. Data are calculated from the Finance (F-1) section, Part B, Current Fund Expenditures for the academic years 1987-88 and 1988-89 as reported in the fall of 1988 and the fall of 1989. The table includes all schools, Canadian and U. S. accredited and non-accredited. Canadian dollars have been converted to U. S. dollars in the calculations. The reader can readily convert the percentage to dollars by multiplying the total per FTE student expenditures from Table 4.08 ($16,052) by the percentage in each line item.

Table 4.25

Expenditure Sources Expressed as a Percentage of Total Expenditures and Mandatory Transfers - Roman Catholic and Non-Roman Catholic Schools		
	Roman Catholic	Non-Roman Catholic
Expenditures		
Educational and General		
Instruction & Net Acad. Support	31.8%	32.1%
Research	0.1%	0.4%
Public Service	0.1%	1.1%
Library	6.7%	6.1%
Student Services	4.2%	2.5%
Admissions	0.8%	1.7%
Inst. Support/Admin & Gen	19.2%	20.6%
Op. & Maint of Plant	15.5%	8.5%
Scholarships & Fellowships	2.5%	4.5%
Mandatory Transfers	1.1%	1.1%
Nonmandatory Transfers	3.5%	10.3%
Subtotal: Educational and General	85.6%	88.9%
Auxiliary/Ancillary Enterprises Expenditures	14.4%	11.1%

Table 4.25: Expenditure Sources as a Percentage of Total Expenditures--Roman Catholic and Non-Roman Catholic Schools

This table is based on the same data as the previous Table 4.23. It offers a comparison, however, of Roman Catholic and non-Roman Catholic schools. The table reflects higher proportionate costs in Roman Catholic schools for plant operations. With smaller enrollments and larger residential facilities, the operating costs for these schools tend to be higher. Scholarship assistance from the school tends to be lower since such help is more often given directly by the church. Student services are higher and reflect the more intensive formation programs. Comparative data from the 1987-88 ATS Fact Book can be found in Table H-2, page 144.

Table 4.25 includes both Canadian and U. S. schools, accredited and nonaccredited. The source of data is the ATS Annual Report Forms, the section on Finance (F-1), Part B, Current Fund Expenditures, for the fiscal years 1987-88 and 1988-89 as reported in the fall of 1988 and the fall of 1989.

Table 4.26: Average Educational and General Expenditure Per FTE Student

This table provides the average educational and general expenditures per FTE student. It includes both mandatory and non-mandatory transfers from the current fund but it does not include auxiliary enterprises. The listing is important in that it describes Canadian costs in Canadian dollars. It also distributes costs (a) according to six groupings based on the size of FTE enrollments; (b) according to whether the school is related to a university or college or is independent; (c) for Roman Catholic and non-Roman Catholic theological schools. Per student costs are based on the school costs as reported in the ATS Annual Report Forms, the section on Finance (F-1), Section B, Current Fund Expenditures, Line 14, for the 1988-89 fiscal year as reported in the fall of 1989. It includes both accredited and non-accredited schools. What is immediately notable is the relatively higher per student costs for the smaller schools.

Table 4.26

Average Educational and General Expense Per FTE Student	
Canadian Schools and Dollars	1989
By FTE Enrollment	
Under 75	$16,601
75-100	$13,255
151-300	$9,168
By University Relation	
University	$11,063
Independent	$12,652
By Roman Catholic/Non-R.C.	
Roman Catholic	$11,999
Non-Roman Catholic	$12,635
U.S. Schools and Dollars	1989
By FTE Enrollment	
Under 75	$22,879
75-100	$17,678
151-300	$14,797
301-500	$13,279
501-1000	$13,759
Over 1000	$8,967
By University Relation	
University	$17,516
Independent	$14,101
By Roman Catholic/Non-R.C.	
Roman Catholic	$14,501
Non-Roman Catholic	$14,474

Table 4.28

Trends in Total Financial Data (U.S. Dollars in Thousands)			
	Total Revenues	Total Expenditures	Surplus (Deficit)
1987-88	$515,468	$519,632	($4,164)
1988-89	$567,699	$566,023	$1,676

Table 4:28: Trends in Total Financial Data--All Schools

This table represents audited financial data as reported in the fall of 1988 and 1989 for the prior fiscal years 1987-88 and 1988-89. It includes all schools, accredited and non-accredited, with Canadian dollars converted to U. S. dollars according to the rate obtaining as of July 1 of the reporting year. Please note that this table reports the total current fund expenditures but excludes non-mandatory transfers. Non-mandatory transfers include those transfers from current funds to other fund groups made at the discretion of the governing board to serve a variety of objectives, such as additions to loan funds, additions to quasi-endowment funds, general or specific plant additions, voluntary renewals and replacements of plant and prepayments on debt principal.

The average deficit for fiscal year was - 0.8 percent of total revenue. Comparable data for prior years can be found in the 1987-88 ATS Fact Book, page 43. The year 1986-87 reported the first deficit (-0.7 percent) in overall operations of theological schools since 1974-75. It is encouraging to note that 1988-89 reported a small average surplus of +0.3 percent, a reversal of the deficits reported in the prior two years. Schools monitor the growth of revenue and expenditures by comparison with the Consumer Price Index (CPI) for the reporting year. A continuing increased focus on financial planning and fund raising is evident in reports from member schools both in the U. S. and in Canada.

Table 4.29

Ratio of Surplus or (Deficit) to Total Revenues - All Schools											
						Percentile					
Year	Minimum	10th	20th	30th	40th	Median	60th	70th	80th	90th	Maximum
1987-88	(77.48)%	(22.07)%	(11.30)%	(5.28)%	(0.67)%	0.25%	1.81%	3.42%	5.28%	10.35%	32.23%
1988-89	(94.08)%	(27.13)%	(13.75)%	(7.84)%	(2.28)%	0.01%	2.01%	4.92%	7.77%	12.21%	100.0%

Table 4.29: Ratio of Surplus or (Deficit) to Total Revenues--All Schools

This table uses the same data as the previous Table 4.28 again excluding non-mandatory transfers from the calculation of total current fund expenditures. This exclusion improves the situation of the school in that it lowers the reported expenditures and thus reduces the overall deficit. In this way the school is not penalized for voluntary transfers from its current fund. The table includes all schools, Canadian and U. S., accredited and non-accredited. The table distributes the ratio of surplus or (deficit) to total revenues on a percentile scale so that the median represents a point where half of the institutions are above and the other half below the median ratio.

Table 4.30

Ratio of Net Educational and General Surplus or (Deficit) to Total Educational and General Revenues - All Schools											
						Percentile					
Year	Minimum	10th	20th	30th	40th	Median	60th	70th	80th	90th	Maximum
1987-88	(83.64)%	(29.13)%	(15.83)%	(9.15)%	(4.41)%	(1.04)%	1.07%	3.86%	7.58%	16.34%	48.35%
1988-89	(109.5)%	(28.53)%	(18.56)%	(11.87)%	(6.20)%	(2.01)%	1.46%	4.67%	8.10%	13.95%	100.0%

Table 4.30: Ratio of Net Educational and General (E & G) Surplus or (Deficit) to total E & G Revenues--All Schools

This table reports only the Net E & G revenue and expenditures which is the most commonly used basis for evaluating the overall health of an institution together with the level and adequacy of support in relation to its programs. It probably reflects best the fiscal dimensions of the institution. The table again distributes the ratios on a percentile scale. The calculation of net educational and general revenue and expenditures does not include auxiliary enterprise revenue or expenditures, nor does it include non-mandatory transfers from the current fund. The data is taken from Parts A and B of the Finance section (F-1) of the ATS Annual Report Forms for the fall of 1988 and 1989, reports based on the audited figures of the previous fiscal years 1987-88 and 1988-89. Data is given for all schools, accredited and non-accredited. We note that the median deficit is greater in 1988-89 (-2.01 percent) than in 1987-88 (-1.04 percent). This reflects a growing constraint on budgets in member schools and is a matter of concern.

Table 4.33

Distribution of Endowment Assets (in U.S. Thousands) Market Value - All Schools												
Year	Number of Schools	Minimum	10th	20th	30th	40th	Percentile Median	60th	70th	80th	90th	Maximum
1987-88	152	$12	$270	$747	$1,534	$2,810	$4,121	$5,309	$7,562	$16,272	$27,647	$302,481
1988-89	154	$13	$437	$894	$1,863	$3,216	$4,513	$6,139	$8,023	$16,630	$32,144	$355,981

Table 4.33: Endowment Assets in U. S. Thousands at Market Value--All Schools

This table offers a distribution on a percentile basis of the market value of endowment funds for all schools as reported in Part F of the Finance Section (F-1) of the ATS Annual Report Forms. Endowment market value for the end of the fiscal year is the basis for the table. The table includes only the schools which reported endowment for the given years. The number of schools is reported in the table for each year. The growth in market value from 1988 to 1989 is evident in almost all percentiles.

NOTES
